**Re: OSLI Project #2005-063
West-wide Energy Corridor Programmatic EIS
Preliminary Draft Energy Corridor Map**

To Whom It May Concern:

The staff of the Office of State Lands and Investments has reviewed the captioned map and offers the following comments relative to the proposed action insofar as it pertains to the mission of this office.

While it is difficult to determine from the Draft Energy Corridor Map the number of acres of state trust surface and mineral resources that could be affected by this initiative, we have no specific concerns at this time. However, we would like to emphasize at this early stage that, notwithstanding the federal NEPA process or federal approvals, the project proponents must comply with the Rules and Regulations adopted by the Board of Land Commissioners in accordance with W.S. 36-2-107 and W.S. 36-9-118, in the event the proposed corridor will traverse state lands.

We look forward to the opportunity to review the Draft Programmatic EIS which will afford this office an opportunity to examine West-wide Energy Corridor proposal in more detail. We appreciate this opportunity to comment. If we may be of further assistance, please do not hesitate to contact this office.

Sincerely,

A handwritten signature in cursive script that reads "Lynne Boomgaarden".
