Comment Submitted:

I'm writing you to show my concern for the 11 Western States Utility Corridor.

With the small amount of information that the residents of Indian Springs, NV, have been given on this project, I'm totally opposed to this corridor.

This corridor should be placed totally on federal land, private landowners should not be effected.

Indian Springs is a unique area with Indian artifacts as well as many settlers graves. Four graves are on our property and who knows how many more exist.

As for the 1998 E.I.S. that was completed it is in my opinion outdated and fatally flawed and also lacks input of Indian Springs residents.

Please consider using the vast Federal holdings rather than going through private and historic lands with this project.

Please keep me posted on the progress of this or any other power or utility corridors going through Indian Springs, NV.
