Comment Submitted:

In Indian Springs, Nevada 89018, the corridor needs to be moved south of Grandpa Mountain and avoid the community area that would be economically and environmentally harmed by utilities in the present corridor. Health and safety concerns require placing the corridor on the southernly route. The airspace over the community needs to be unobstructed, for both military and civilian aircraft in their respective areas. The rural aesthetics would be destroyed by hugh towers with blinking lights, or pipelines going through the spring areas and the historic old ranch..
