All of your proposed routes appear to be on existing corridors. Please use current technology to BURY any and every future transmission line and/or pipeline. It CAN be done. It is not too expensive! Moving energy from source to final destination must be undergrounded to preserve the rural nature of these federal lands. Most corridors were hard fought battles and are not necessarily located in the best physical location, but rather were political decisions. Nobody wants to live near a utility corridor - so make them more palatable, by UNDERGROUNDING ALL TRANSMISSION LINES, AND PIPES.
