

10-21-05 0002 3241 Boxelder Dr.

Dear Sirs:

Cheyenne, WY 82001

RE comments ON Energy Corridors as Part  
of the Energy Policy Act.

My point of view ~~of~~ comment is that  
one or they should avoid designating  
new corridors and use existing corridors  
to the maximum extent. This will  
avoid many of the possible negative  
impacts and allow for an increase  
in transmission capabilities.

Seeing 200-foot-tall transmission towers  
at South Pass, the site of an early gold  
mining town, through which the Oregon  
and Mormon trails, among others, and the  
Pony Express traveled, would be an  
incredible disruption.

Sincerely,

Albert Richard Litner - Biologist
