City: Houston

State: TX

Zip: 77002

Country: USA

Privacy Preference: Don't withhold name or address from public record

Comment Submitted:

PEIS scope should include issues of specific concern to oil pipelines such as:

- corridor locations in relation to oil infrastructure and impacts on non Federal land to build to and from corridors.
- safety issues related to building and accessing pipelines in corridors with high voltage transmission lines.
- operational issues such as cathodic protection interference, static electricity, etc.
- constructability issues that might impact corridor width, including space for ditching, stringing pipe, welding, etc. Also minimum distance from electric transmission tower

foundations.

- environmental impact issues that are unique to oil pipelines
